

REMARKS/ARGUMENTS

The Official Action has been carefully considered and the Examiner's comments are duly noted.

Reconsideration of this Application in light of the Amendments for the Claims is respectfully solicited.

With respect to Claim 1, all of the Examiner's comments have been considered and Claim 1 has been amended to meet the points pointed out in the Official Action. If there are any matters outstanding, the Examiner is respectfully asked to call Applicant's attorney to do whatever is necessary to place the Application into condition for allowance.

In addition, Claim 5 has been amended so as to take care of the term "it" as pointed out by the Examiner. In going over the Claims, my minor formal editorial amendments have been effected to Claims 2, 11 and 12.

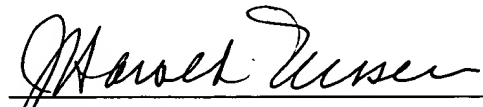

With respect to the Specification, a typographical error has been noted on page 11 and lines 5 to 7 have been amended. The prior art has been considered, and Applicant agrees with the Examiner that the Claims as previously on file, as well as now submitted, clearly and patentably distinguish from all of the reference of record and the Examiner's reasons for allowability is accepted.

If there are any charges outstanding, such charges may be respectfully charged to our Deposit Account No. 50-3108.

It should be noted that a drawing correction is being filed. For this purpose reference numeral 4 has been added and it appears on the sheet designated "Replacement Sheet." Also, another copy of the drawing designated "Annotated Sheet Showing Changes" has the added reference numeral circled in Red for ready reference.

Early and favorable reconsideration is respectfully solicited, together with the allowance of this Application.

Respectfully submitted,
LACKENBACH SIEGEL, LLP
